Current Transformers · Control Transformers · Battery Chargers · Industrial Electrical Equipment

Panchkula / Chandigarh, India

ISO 9001:2015 Certified · GeM Registered · Udyam MSME · IREPS

SECTION 1: TARGET SEO KEYWORDS

Use these keywords strategically across all pages. High-priority keywords should appear in H1 tags, meta titles, and first 100 words of body copy. Secondary keywords go in H2s, alt text, and body paragraphs.

1.1 Primary Keywords (High Intent — Target Buyers)

Keyword	Intent	Est. Volume (India)
current transformer manufacturer India	Commercial	1,000–5,000/mo
current transformer manufacturer Chandigarh	Commercial	100–500/mo
CT manufacturer in India ISO certified	Commercial	100–500/mo
control transformer manufacturer India	Commercial	500–2,000/mo
control transformer supplier Panchkula	Commercial	50–200/mo
industrial battery charger manufacturer India	Commercial	500–1,000/mo
FCBC battery charger manufacturer	Commercial	200–500/mo
current transformer for railway RDSO	Commercial	100–500/mo
GeM registered electrical equipment supplier	Commercial	100–300/mo
IS 2705 current transformer manufacturer	Commercial	50–200/mo

1.2 Long-Tail Keywords (Lower Competition, High Conversion)

Keyword	Intent	Est. Volume (India)
buy current transformer online India B2B	Transactional	100–500/mo
current transformer 5VA 0.5 class India	Transactional	50–200/mo
multi-tap control transformer manufacturer	Commercial	50–200/mo
metering class CT manufacturer IS 2705	Informational/Commercial	50–200/mo
industrial battery charger 24V 48V India	Transactional	200–500/mo
electrical equipment manufacturer North India	Commercial	100–500/mo
MSME electrical equipment supplier India	Commercial	100–300/mo
current transformer supplier for HVPN	Commercial	10–50/mo

control transformer for CNC machine India	Commercial	50–200/mo
transformer manufacturer for power utilities India	Commercial	200–500/mo

1.3 Informational / Blog Keywords (Build Authority & Organic Traffic)

Keyword	Intent	Est. Volume (India)
how does a current transformer work	Informational	1,000–5,000/mo
difference between CT and PT transformer	Informational	500–2,000/mo
IS 2705 standard for current transformers	Informational	100–500/mo
how to select control transformer for panel	Informational	100–500/mo
RDSO vendor approval process India	Informational	100–300/mo
GeM portal electrical equipment registration	Informational	200–500/mo
what is FCBC battery charger	Informational	100–300/mo
transformer accuracy class 0.1 0.2 0.5 1	Informational	500–2,000/mo
current transformer for energy meter India	Informational	200–500/mo
ISO 9001 certified transformer manufacturer India	Commercial	200–500/mo

SECTION 2: HOME PAGE

2.4 Core Specialisations Section

Section Heading (H2)

What We Manufacture

Intro Copy

From precision metering current transformers for HVPN and Powergrid substations, to rugged control transformers powering CNC and automation panels, Alliance Engineering delivers engineered reliability at every voltage level.

Card 1: Current Transformers

High-accuracy measuring and protection CTs built to IS 2705. Available in wound, bar-primary, and ring-core configurations. Accuracy classes 0.1 to 3, burden 2.5 to 30 VA. Suitable for energy metering, SCADA, and relay protection.

Card 2: Control Transformers

Single-phase and three-phase control transformers for machine tools, CNC panels, and industrial automation. Custom VA ratings from 50 VA to 10 KVA. Copper winding, laminated CRGO core, conformal coated for harsh environments.

Card 3: Battery Chargers

Float-cum-boost (FCBC) industrial battery chargers for substations, UPS systems, and telecom applications. Input: 230V AC $\pm 10\%$. Output: 12V–220V DC, up to 200A. Compliant with IS 1869.

Card 4: Potential Transformers

Metering and protection class PTs as per IS 3156. Voltage ratios to 33 kV. Suitable for power metering panels, energy audit systems, and protection relays.

2.5 Why Alliance Engineering Section

Section Heading (H2)

Why Industrial Buyers Choose Alliance Engineering

Point 1 — ISO Quality

ISO 9001:2015 certified manufacturing process. Every transformer is tested as per IS standards before dispatch — accuracy, insulation resistance, and polarity.

Point 2 — GeM & IREPS Ready

Registered on GeM and IREPS portals. Government departments and railway divisions can procure directly via tender without additional documentation delays.

Point 3 — MSME Pricing

Udyam-registered MSME manufacturer. Competitive pricing without compromising on copper winding quality, CRGO core grade, or IS compliance.

Point 4 — Custom Engineering

Non-standard ratios, multi-tap configurations, special burdens — we engineer to your specifications. Prototypes typically dispatched within 10–15 working days.

Point 5 — North India's Fastest Delivery

Manufacturing base in Panchkula/Chandigarh. Same-day dispatch for standard stock items. PAN-India logistics with express delivery to Delhi, Punjab, Haryana, HP, and UP.

3.1 SEO Meta Tags

Meta Title	About Us — Alliance Engineering Company 30+ Years of Transformer Manufacturing
Meta Description	Learn about Alliance Engineering Company — founded 1992 in Chandigarh. ISO 9001:2015 certified manufacturer of current transformers, control transformers & battery chargers. Trusted by POWERGRID, HVPN & railways.
Primary H1	Engineering Excellence Since 1992 — Alliance Engineering Company
Schema Type	AboutPage + Organization

3.2 Hero / Intro Section

H1 Headline

Engineering a Better Future. Manufactured in Chandigarh.

Established Badge

Est. 1992 · Panchkula, Haryana

Body Copy (150–200 words)

Alliance Engineering Company was founded in Chandigarh in 1992 with a singular purpose: to manufacture electrical measurement and control equipment that Indian industry could trust absolutely.

For over three decades, we have designed and delivered current transformers, control transformers, potential transformers, and industrial battery chargers to power utilities, government departments, railways, private manufacturers, and educational institutions across North India.

We do not distribute. We do not trade. We manufacture — from copper winding to final testing — in our own facility in Panchkula. Every unit that leaves our factory carries the weight of 30+ years of engineering experience and an ISO 9001:2015 quality management system.

Our products are registered on GeM and IREPS, enabling seamless procurement by government and railway buyers. We hold Udyam MSME registration, delivering enterprise-grade electrical equipment at competitive Indian manufacturer pricing.

3.3 Timeline / Company History Section

Section H2

Three Decades of Structural Excellence

1992 — The Foundation

Alliance Engineering Company established in Chandigarh. Initial focus on current transformer manufacturing for local industrial and utility clients in Punjab and Haryana.

2000s — Industrial Expansion

Expanded product range to include control transformers and battery chargers. Began supply to state electricity boards, government departments, and private manufacturers in North India.

2015 — Quality Milestone

Achieved ISO 9001:2015 certification. Implemented formal quality management system for design, manufacturing, testing, and dispatch of all transformer products.

2020s — Government & Railway Channels

Registered on GeM portal and IREPS for government and railway procurement. Obtained Udyam MSME registration and Class 3 DSC for tender participation. Active supplier to POWERGRID, HVPN, and railway contractors.

3.4 Mission & Vision Section

Mission (H3)

Uncompromising Precision.

Mission Copy

To deliver current transformers and industrial electrical equipment that consistently meet or exceed IS 2705, IS 3156, and IS 1869 standards — ensuring measurement accuracy, operational safety, and long service life for every client we serve.

Vision (H3)

Structural Integrity. Built for India.

Vision Copy

To become the most trusted name in precision transformer manufacturing in North India by 2030 — recognised by utilities, railways, and industrial buyers for consistent quality, reliable delivery, and responsive technical support.

3.5 Values Section

Section H2

Foundation of Values

Value 1 — ISO Quality

ISO 9001:2015 is not a badge for us — it is our manufacturing baseline. Every process, from raw material selection to final polarity testing, is documented and audited.

Value 2 — Zero Defects Standard

We operate a zero-defects dispatch policy. Every CT and PT undergoes ratio test, polarity test, insulation resistance measurement, and visual inspection before leaving the factory.

Value 3 — Customer Centricity

We do not believe in off-the-shelf-only sales. If your application requires a non-standard ratio, a custom burden, or a specific terminal configuration — we engineer it for you.

Value 4 — Technical Mastery

Our engineering team has hands-on experience with IS 2705, IS 3156, and IEC 61869 standards. We support our clients with technical consultation at no additional charge.

3.6 Certifications CTA Section

Section H2

Committed to Indian & International Standards

Copy

Every Alliance Engineering product is manufactured against applicable Bureau of Indian Standards (BIS) specifications. Our quality system is independently audited and ISO 9001:2015 certified.

Certifications to Display

ISO 9001:2015 · Udyam MSME Certificate · GeM Seller Registration · IREPS Vendor Registration · IS 2705 (Current Transformers) · IS 3156 (Potential Transformers)

Pan-India Supply Network

4.3 Public Organisations & Government Sector

Section H2

Public Organisations & Government Sector

Intro Copy

Alliance Engineering is a GeM and IREPS registered vendor, enabling direct procurement by government departments, public sector undertakings, and railway divisions without tendering barriers. Our products meet all BIS and relevant Indian Standards required for government electrical procurement.

Client List — Government & Utilities

- POWERGRID Corporation of India (Current Transformers for 33 kV/66 kV substations)
- HVPN — Haryana Vidyut Prasaran Nigam (Metering and protection CTs)
- UP Vidhyut Vitran Nigam Limited (Metering transformers for rural electrification)
- Chandigarh Power Distribution Ltd (Control transformers and metering CTs)
- NPC — National Projects Construction Corporation
- IOFVIA (Indian Ordnance Factories)

4.4 Private Sector & Industrial Enterprise

Section H2

Private Sector & Industrial Enterprise

Intro Copy

From steel plants to financial institutions, our current transformers and control transformers are deployed wherever measurement accuracy and electrical reliability are non-negotiable.

Client List — Private Sector

- JSW Steel — Control transformers for plant automation
- HDFC Bank — UPS and battery charger systems
- Jio — Telecom infrastructure battery chargers
- ESAB India — Welding equipment control transformers
- ABB / GE Automation — Measurement and protection CTs
- EMCO, DAMCO, CBL, Gilco, Jay Bee Industries, ATHA Group, Taalin, Robins

4.5 Educational & Research Institutions

Section H2

Educational & Research Institutions

Intro Copy

Our transformers are trusted in educational research laboratories and infrastructure projects at leading universities in North India, where accuracy and repeatability are critical.

Client List — Education

- Panjab University — Structural analysis & test lab CTs
- Thapar Institute of Engineering & Technology — Research & testing collaboration
- Indian School of Business (ISB) — Infrastructure power systems
- Chandigarh University — Academic infrastructure

- Chitkara University — Technical partnership
- Lovely Professional University (LPU) — Institutional grid solutions

4.6 Bottom CTA Section

5.4 Address & Map Section

Section H2

Our Manufacturing Facility

Full Address

Alliance Engineering Company, Plot No. [INSERT], Industrial Area Phase II, Panchkula — 134113, Haryana, India

Technical Support Hours

Monday – Friday: 9:00 AM – 6:00 PM IST

Saturday

10:00 AM – 2:00 PM IST

SEO Tip: Embed a Google Maps iframe with your exact pin location. Also add LocalBusiness JSON-LD schema with latitude/longitude, openingHours, telephone, and address. This is critical for ranking in 'transformer manufacturer near me' searches.

5.5 Value Propositions Below Map

Value 1 — Fast Response

All enquiries acknowledged within 4 business hours. Technical quotes within 1 working day for standard products.

Value 2 — Secure Communications

Your technical specifications and project blueprints are treated with complete confidentiality under our NDA policy.

Value 3 — Pan-India Reach

Manufacturing in Chandigarh. Supply across India — Delhi NCR, Punjab, Haryana, Himachal Pradesh, Uttarakhand, Uttar Pradesh, and beyond.

SEO Tip: Fix the footer — replace 'Silicon Valley, CA' and 'Berlin, DE' with your actual Chandigarh address. Inconsistent NAP (Name, Address, Phone) across pages hurts local SEO significantly.

SECTION 6: TECHNICAL SEO & ADDITIONAL RECOMMENDATIONS

6.1 Critical Content Fixes (Do First)

- FOOTER: Replace 'Global HQ — 1200 Industrial Park, Silicon Valley, CA' with actual Panchkula/Chandigarh address on ALL pages.
- FOOTER: Remove 'European Hub — Berlin, DE' unless you have an actual European office — fictitious addresses harm local SEO trust.
- CONTACT PAGE: Update phone from +91 172 555 0192 (placeholder) to your real number.
- CONTACT PAGE: Update email from contact@alliance.eng to your real domain email.
- ABOUT PAGE: Replace placeholder staff names (Rajesh Khanna, Anjali Sharma etc.) with real team or remove the section entirely.
- HOME PAGE: Change 'Industry Leader Since 1994' to '1992' to match your actual establishment year.
- ALL PAGES: Change dropdown option 'Architectural Design' in contact form — not relevant to an electrical manufacturer.

6.2 Schema Markup (JSON-LD) — Add to Every Page

Add the following schema types in <script type='application/ld+json'> tags:

- LocalBusiness / ManufacturingBusiness — Name, address, phone, geo, openingHours, logo
- Organization — Name, URL, logo, sameAs links (IndiaMART, GeM, LinkedIn, JustDial)
- Product — For each product page: name, description, manufacturer, brand, offers
- BreadcrumbList — On all inner pages for better SERP appearance
- FAQPage — On product pages with common buyer questions

6.3 Products Page Recommendations

Each product (CT, Control Transformer, Battery Charger, PT) should have its own dedicated page at /products/current-transformers, /products/control-transformers etc. with:

- Unique H1 with primary keyword (e.g. 'Current Transformer Manufacturer in India — Alliance Engineering')
- Technical specifications table (ratio, burden, accuracy class, IS standard, dimensions)
- Downloadable datasheet PDF (also great for backlinks)
- Application list: metering, protection, energy audit, SCADA, relay
- Product schema markup
- FAQ section targeting informational keywords

6.4 Local SEO Checklist

- Create and fully verify Google Business Profile for Alliance Engineering Company, Panchkula
- Consistent NAP (Name, Address, Phone) across website, IndiaMART, JustDial, GeM, and Google Business
- Get reviews on Google Business and IndiaMART from actual clients
- Create city landing pages if you want to rank in: Delhi, Ludhiana, Ambala, Bathinda, Shimla
- Add Chandigarh / Panchkula / Haryana geo-modifiers naturally in home and contact page body copy

6.5 Content Marketing — Blog Topic Ideas

Publishing 1–2 articles per month on these topics will drive organic traffic from engineers and procurement managers:

- How to Select the Right Current Transformer for Your Substation (IS 2705 Guide)
- CT Accuracy Classes Explained: 0.1, 0.2, 0.5, 1, 3 — What Do They Mean?
- Float-Cum-Boost (FCBC) Battery Charger: Working Principle & Applications
- Control Transformer vs Isolation Transformer: Key Differences
- How to Participate in IREPS Railway Tenders as an Electrical Equipment Manufacturer
- GeM Portal Registration for Electrical Equipment Manufacturers — Step by Step
- RDSO Vendor Approval for Transformer Manufacturers: Full Process Explained
- IS 2705 vs IEC 61869: Which Standard Applies to Your CT?

6.6 Page Speed & Technical SEO

- Compress all hero images — use WebP format at max 150 KB for hero, 50 KB for product thumbnails
- Add alt text to every image with keyword-rich descriptions
- Ensure mobile responsiveness — especially the contact form and nav menu
- Add XML sitemap at /sitemap.xml and submit to Google Search Console
- Add robots.txt allowing all product, about, contact, and client pages
- Install SSL (HTTPS) — required for ranking and trust
- Target Core Web Vitals: LCP < 2.5s, CLS < 0.1, FID < 100ms

— End of Document —
